

CDMA 450MHz KHD KM450 Module "A"- Band

General Description

The KM450 Module from KHD is an embedded communication module utilizing Code Division Multiple Access (CDMA) technology. It operates in the CDMA450 "A-block" spectrum band. The module is powered by Qualcomm® MSM6800A and provides a 52-pin Mini PCI Express connector for user application and two U.FL connectors for antenna diversity. Controlled by simple AT commands, it allows easy integration in customer projects.

Features

- Easy integration
- Quick time to market
- CDMA 450MHz A-band
- CDMA2000 1xEv-Do Rev. A
- Based on Qualcomm®
- Antenna diversity
- Compact size 15 X 30 X 5mm
- Mini PCI Express

Technical Specification

Parameter	Specification
Radio Parameters	
RF Technology	CDMA2000 1x RTT CDMA2000 1xEv-Do Rev. A
Frequency Range	Uplink: 452–457.475 MHz Downlink: 462–467.475 MHz
Sensitivity	Below –101dBm
Data Rate	Down link : 3.1Mbps Up Link : 1.8 Mbps max
Interfaces	
Mechanical Interface	52-pin Mini PCI Express connector
Application interfaces	USB PCM R-UIM
Mechanical	
Size	51.0mm×30.0mm×5.0mm
Weight	About 8g
Supply Voltage , Power consumption	
VCC	3.0~3.6V
Maximum Power Consumption	<3.3 W
Environment	
Operating temperature	-10°C to +55°C
Storage temperature	-40°C to +85°C
Operating Humidity	5%–95%
Supported standards	
IS-95 A/B, IS-98A, IS-126, IS-637A, IS-707A, IS-2000, IS-856
